

# Channel and Display Defaults

Below are the defaults for Channels and Displays

---

## Defaults

### Common

Name	Type	Default	Description
filter	<i>string</i>	filter	Reconstruction rule. Supported values: default (filter), min (min), max (max), average (average), zmin (zmin), zmax (zmax), sum (sum).
relativepixelvariance	<i>float</i>	0	
remap	<i>float[3]</i>	0 0 0	
shadowthreshold	<i>float</i>	0.01	Threshold used to compute shadowing contributions in LPEs containing the 'shadow' token. If the shadow is cut, lower the threshold. If there are white pixels in shadowed areas, raise the threshold.
source	<i>string</i>	<i>empty</i>	AOV source name or Light Path Expression.
statistics	<i>string</i>	none	Supported values: none, variance, mse, even, odd.

### Common

Name	Type	Default	Description
ActiveBuckets	<i>int</i>	<i>empty</i>	
BucketOrder	<i>int</i>	<i>empty</i>	
BucketSize	<i>int[2]</i>	<i>empty</i>	
camera	<i>string</i>	<i>empty</i>	
ChannelCount	<i>int</i>	<i>empty</i>	
ChannelNames	<i>string</i>	<i>empty</i>	
CheckpointElapsedTime	<i>float</i>	<i>empty</i>	
CheckpointIncrement	<i>int</i>	<i>empty</i>	
CheckpointKeep	<i>int</i>	<i>empty</i>	
CheckpointThreads	<i>int</i>	<i>empty</i>	
far	<i>float</i>	<i>empty</i>	
HostComputer	<i>string</i>	<i>empty</i>	
mode	<i>string</i>	<i>empty</i>	
near	<i>float</i>	<i>empty</i>	
PixelAspectRatio	<i>float</i>	<i>empty</i>	
remap	<i>float[3]</i>	<i>empty</i>	
Software	<i>string</i>	<i>empty</i>
