

APIs

This section covers the usage of Tractor's APIs and job scripting syntax.

Job Scripting	The Tcl-based syntax for authoring jobs.
Job Author API	The Python API for authoring jobs.
Query API	The Python API for query and control of jobs, tasks, commands, and blades.
URL API	The URL API for communicating directly with the engine.
Search Clause Syntax	The syntax used in the Dashboard, tq, and query API for searching for jobs, tasks, commands, and blades.
