Projection Plugins

A "Droste" Lens
(Custom projection plugin by Rob Pieké)

PRMan has the ability to create custom RixProjection plugins. These plugins can be used to characterize camera and lens projections. The distribution includes several built-in plugins, as well. Note that whether or not the depth of field and bokeh settings apply to projection plugins depends on the individual plugin. Below we explain the most common and full-featured projection plugin.

- PxrCamera
- PxrPanini
